You must build an HTML form with the following requirements:

- The form tag must look <u>exactly</u> like this:
  <form action = "http://172.27.104.6:9000/commentForm/" method="POST">

- Your form must have elements with the following information:
  - A text input with the name and id of 'firstname'
  - An email input with the name and id of 'email'
  - A password input with the name and id of 'password'
  - A select input with the name and id of 'grade'. This should have options for grade 9, grade 10, grade 11, and grade 12. The values must match the number of the grade.
  - A select input with the name and id of 'house'. This should have options for red, blue, green, and yellow. Don't forget to set the values to 'red','blue','green', and 'yellow'.
  - A textarea input with the name and id of 'comment'.
  - A submit button.

You will test your form with the following information:

Name:	Mileaux
Email Address:	mileaux@dog.com
Password:	snacksplussleep=fun
Grade:	9
House:	green
Comment:	Is it time to play?

If your form is configured <u>exactly</u> as described above, you will receive a PASS on the form response page. Pay attention to detail! Let Mr. Weinberg know if you need help along the way.
